---

Hello,  
I wanna give the community back, they gave me a lot  
I'm a professional python, php, mysql developer. professional means that I  
live from it ;-), I used to build custom content management systems for  
different client's sites, and now working on a new cms I call it aikicms,  
will be online soon ( two months from now that what I call soon), it's php  
and mysql, and will be released under GPL. I'll tell you more about it soon,  
it has some unique features. I call those features ( the self constructed  
admin tools ).  
will aikicms isn't the most important part here,  
please tell me how can I start helping you? I really love and want to..

Thank you all  
Bassel Safadi
